

IV International Scientific Conference Microbiology and Immunology — the development outlook in the 21st century

Kyiv,
7-8 of April
2022

Dear colleagues and friends!

The Organizing Committee is looking forward to meeting you at the postponed edition of the **IV International Scientific Conference "Microbiology and Immunology- the development outlook in the XXI Century"** on 7-8 April 2022 in Kyiv, Ukraine.

Our conference is taking place for the fourth time in the *Taras Shevchenko National University of Kyiv*, a leading higher educational institution of Ukraine. Since its inception in 2014, our conference brings together microbiologists and immunologists in Ukraine and abroad. During the 2-day-event, participants and invited leaders in the field will present their latest findings in sessions focused on: fundamental research in immunology (molecular mechanisms of functioning of the immune system); immunopathology and the role of the immune system in human and animal pathologies; immunodiagnostics (prospects for its application in medicine, veterinary science, crop sector and industrial (manufacturing) processes); immunotherapy and immunobiotechnology; the role of microorganisms in pathological processes; microorganisms survival in extreme conditions; the applied aspects of microbiology; methodical basis of teaching of microbiology and immunology.

We are confident that the upcoming meeting will be a professional platform for the exchange of scientific achievements and personal experiences for all delegates, bringing together research scientists, medical and higher education professionals, industry partners to discuss prominent advances from the lab to the clinic and higher education.

For young scientists, this is an opportunity to meet and communicate with leading scientists and practitioners in an informal setting, as well as to acquire new valuable knowledge by attending keynote lectures and workshops.

The vibrant and stimulating atmosphere at our Conference gives everybody an opportunity to appreciate the world of science in a wider context. We hope to see a fresh generation of science enthusiasts next year as well, so please mark your calendars and see you at the IV International Scientific Conference "Microbiology and Immunology - the development outlook in the XXI Century".

The Conference Organizing Team

The details regarding format will be announced later but depending on pandemia it may be virtual or hybrid. In case you have any questions feel free to contact us: microbimconf2022@gmail.com. Also stay tuned on our [official Homepage](#) and [facebook](#) account.

Important Dates:

Abstract submission begins: November 1, 2021

Abstract submission ends: March 15, 2022

Notification of Acceptance: Within two weeks after the submission

Registration begins: November 1, 2021

Registration ends: April 5, 2022
