

Ostapchenko Liudmyla Ivanivna

Director of the Educational and Scientific Centre "Institute of Biology and Medicine", Doctor of Biological Sciences, Full Professor, Academician of the Academy of Sciences of Higher Education of Ukraine, Honored Scientist of Ukraine in Science and Technology, Laureate of the State Prize of Ukraine in Science and Technology, recipient of the Palladin Prize of the National Academy of Sciences of Ukraine.

Academic Education

The tradition of high-quality training of Medics at our University goes back to 1840, when the Faculty of Medicine was founded at then the Imperial University of St. Volodymyr by the Decree of Emperor Nicholas I. Professor Karavayev became its first Dean. During more than 80 years of its existence within the University, such outstanding personalities as Danylo Zabolotny, Mykhaylo Kolomyichenko, Mykola Strazhesko, Teofil Yanovsky, Mykola Volkovich, Vadim Ivanov, and other outstanding clinicians studied here. Faculty of Medicine was transformed into Kyiv Medical Institute (presently O.O. Bogomoletz National Medical University) in 1921. Almost a hundred years of history of medicine teaching at our University has left not only a bright track in the educational space and a constellation of outstanding graduates, but also other priceless heritage: in 1842, Department of Human Physiology and in 1868, Department of Histology and Embryology were founded, which laid the foundations for the creation of the Faculty of Biology (Departments of Botany and Zoology have existed since the founding of St. Volodymyr Imperial University in 1834, then at the Faculty of Philosophy). As a separate unit the Faculty of Biology began to function in 1933. Founded in 2009, the Educational and Scientific Centre (ESC) "Institute of Biology", created by merging the Faculty of Biology of the University and a number of research institutions, continued the glorious traditions of its predecessors. Its strong research and educational potential allowed the Institute to reconstitute Medicine as the direction of its educational activities in 2016, while becoming the Educational and Scientific Centre "Institute of Biology and Medicine".

Today the ESC "Institute of Biology and Medicine" has highly skilled personnel (PhD and Doctors of Sciences) capable to implement medical education. It has well-developed research facilities (state-of-the-art laboratory complex, modern equipment) and the best among Ukrainian Universities experimental laboratory base (a system of educational and educational-scientific laboratories with modern equipment and qualified personnel) and also clinics of different specializations. It is a powerful educational and research institution, where, by engaging in the educational process the leading national and international experts, highly qualified next-generation doctors are trained in different specialties.

Starting the research career

Successful completion of study program "Medicine" is inextricably connected with obtaining of deep fundamental theoretical knowledge as well as practical skills in all of the fields of modern clinical practice. Having received Diploma of the secondary level "Master" in Medicine you can work as a doctor in the corresponding primary position, with the ability to provide different medico-diagnostic, medico-preventive and medico-social services to the population in the general system of primary medical and sanitary care. For further professional training, specialists, who has received Diploma of the secondary level "Master", can get the chosen qualification in internship and residency according to the corresponding programs of postgraduate education. As medical diplomas issued by the Ukrainian educational establishments are world-wide recognized, applicants can succeed in their professional development in many countries.

Laboratory diagnostics is one of the priority areas of medical activities, which is constantly developing and improving, both in Ukraine and abroad. Our graduates specializing in "Technologies of medical diagnostics and treatment" (program of education "Laboratory Diagnostics") may enjoy a wide range of employment opportunities: clinics and hospitals of all levels from district to regional, laboratories at medical universities, colleges and research institutions, the blood transfusion stations, centers of standardization and metrology; the sanitary-epidemiological service, diagnostic centers, forensic laboratories.

Classical university education, high quality educational level, scientific conception of the world formed within the University, the abilities to organize their professional work and apply the acquired theoretical knowledge to practice allow the graduates of the Institute to develop their leadership qualities and successfully manage research, applied scientific and administrative enterprises in Ukraine and abroad.

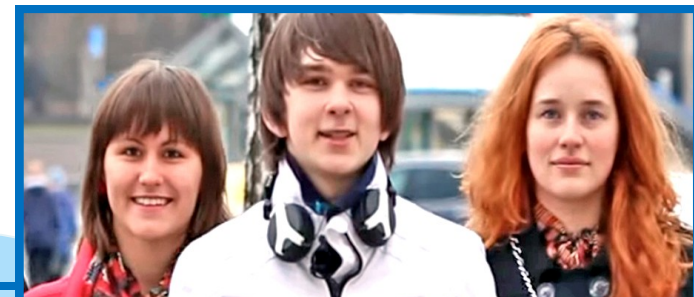

Integration of research and education

The Institute maintains close working relations with many educational and research organizations both nationally and internationally (including USA, United Kingdom, France, Germany, Spain, Italy, Estonia, Czech Republic, Bulgaria, Poland, Hungary, Belgium, Belarus, China, Taiwan, Vietnam and others). Members of its staff publish their research papers in high-impact international journals. Programs for scientific and educational integration developed at the Institute (including international cooperation) with participation in the educational process of leading national and international medical experts enable an efficient training of highly qualified next-generation medics. Within the Institute, there are programs of academic mobility, which allow our students to engage in research or study at overseas educational and research centers of excellence. Our students have every opportunity to combine both studies and experimental investigations and join modern international scientific community through the attendance of lectures, given by invited visiting leading international scientists, by participating in scientific clubs according to the field of interest, as well as international research conferences and by publishing results of their research works in the international scientific journals.

Comfort conditions for study and recreation

Students may be accommodated in a 9-storey block-type building not far away from the Institute. Regular services at dormitories include study rooms with wireless internet connection, modern sport facilities, laundering area equipped with automatic washing machines, as well as meeting rooms of the Student Council, rooms for playing ping-pong and performing workout.

Become Ukraine's elite together with us!

Enrollment requirements

Foreigners or individuals without citizenship

Applicants need to undergo the following interviews:

- English or Ukrainian language, accordingly to the chosen language of studying;
- Biology

The programs of interviews are approved and published four month prior to the start of the admission process.

CONTACTS:

Main University building:

City of Kyiv, 60 Volodymyrska Street.

Educational Programs

First educational degree "BACHELOR" (full-time studies)

Branch 22 "Public Health"

Syllabus 224 "Technologies of medical diagnostics and treatment"

Study program:

- "Laboratory diagnostics" (professional qualification – 3221 Laboratory Assistant "Medicine")

Language of studying: Ukrainian, English

Study duration: 4 years.

Second educational degree "MASTER" (full-time studies)

Branch 22 "Public Health"

Syllabus 222 "Medicine"

Study program:

- "Medicine" (professional qualification – 2221.2 Doctor)

Study duration: 6 years.

Language of studying: Ukrainian, English

Study duration: 6 years.
